OBJECTIVE

I am interested in Natural Language Processing as it applies to Artificial Intellegence and research in human language and behaviors. My educational background is in linguistics and I find language processing applications fascinating. I look forward to finding a way to implement that into a software development career.

SKILLS

- Experience in Fullstack Software Development
- Able to successfully manage multiple priorities and meet deadlines.
- Experience annotating audio data within a linguistic setting in a variety of platforms
- Participated in and performed small case studies and research projects in a variety of subjects.
- Learned hands-on skills and tools to conduct surveys and studies in a variety of subjects.
- Eager to learn new skills and get established within my career.
- Ultimate teamworker, I love group projects.
